

Oregon Trail School District School Closure and Snow Route Information

In the event that one or all schools in the District experience conditions requiring closure of schools or modified bus routes, public information will be released through the area broadcasting stations. Emergency closure is usually the result of snow, wind or icing conditions. However, other types of emergency closures may result due to natural disaster or mechanical failure. Some media normally broadcasting closure information include:

In addition to media stations, the most accurate and up to date closure information may be obtained via the district web-site www.oregontrailschools.com.

If the school is operating on “Snow Routes Only” and your road is listed below, plan to catch your bus at the alternative bus stop as listed. This applies to the small mini buses also. If your bus stop is on a steep part of a road that is traveled on snow routes, plan to catch the bus where it can safely stop and start up again. **If snow routes are run in the morning, they will also be run in the afternoon regardless of weather conditions.**
