

Transportation During Hybrid Learning

School bus transportation will be available for students during Hybrid Learning.

Protocols are in place for loading and unloading school buses and delivering students safely to their schools:

- Drivers and students wear face coverings
- 6 feet physical distance between driver and students
- Siblings sit together
- Passive visual screening for symptoms as students enter bus
- Students exhibiting symptoms seated at the front and given a face mask for added protection, then isolated and monitored at school while waiting for parent pickup
- Buses sanitized between routes

We also want to encourage students to:

- Dress warmly in case windows are open for fresh air circulation, and
- Maintain physical distancing while waiting at the bus stop or pickup site.

Bus drop-off and pick-up at school:

- AM buses will release students one bus at a time to avoid mixing cohorts as they enter the school building.
- PM buses will have elementary students escorted to the bus one classroom at a time, and middle and high school students will be released at staggered times to minimize cohort mixing.

Parent drop-off and pick-up at school:

- Parents will drop students off at a designated area at the school.
- Parents picking up students will wait either in the secure foyer area of the school or their car for their student to be released.

Find your bus route information:

- Go to [Traversa Ride 360](#). Click on 'Register.' Set up your email address as your Username, set up a Password, enter your full name, then click 'Submit.' Once in the website, you can find your student by entering their Student ID number and their date of birth (enter a 2-digit month for the DOB).
- You may also call your student's school directly for their bus route information.
- Should neither of these paths work for you, call the bus barn at 503-668-8855.

Visit the [Student Transportation webpage](#) for additional transportation information.
