

# Oregon Trail Return to School Survey Results

In mid-December we requested parent input regarding state metrics and protocols for reopening schools. We received a total of 2330 responses from across the district and want to thank everyone who participated. The following results will help guide our local plan for safely returning students to in-person learning.

## Ready for In-Person Learning

80% of parents said they would send their students back to in-person learning if given the chance. This number did not change significantly when asked about vaccines or health and safety.

## Health & Safety

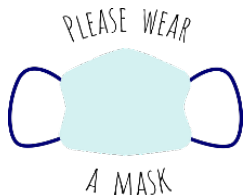

The most important safety protocols to parents were:

- 27% sanitizing and disinfecting surfaces
- 22% symptom screening
- 18% wearing masks
- 17% physical distancing

## Riding the Bus

44% of parents would send their students to school on the bus.
